PHYSICS: A PRACTICAL AND CONCEPTUAL APPROACH 4/E
Overhead
Transparencies

<u>No.</u>	<u>Identification</u>	<u>Page</u>	<u>Topic</u>
1.	Fig. 1.2	6	Average speed and constant speed
2.	Fig. 1.4	7	Acceleration
3.	Fig. 1.5	8	Unbalanced or net force
4.	Fig. 1.9	11	Acceleration is proportional to F/m
5.	Fig. 1.10	13	Friction
6.	Fig. 1.18	20	Newton's third law force pairs
7.	Fig. 2.1	28	Work is force times distance
8.	Fig. 2.9	33	Conservation of energy
9.	Fig. 2.10	34	Other examples of conservation of energy
10.	Fig. 3.8	52	Collisions and conservation of momentum
11.	Fig. 3.9	52	Momentum transfer in elastic collisions
12.	Fig. 4.2	63	Horizontal projection
13.	Fig. 4.3	64	Projection at an angle
14.	Fig. 4.5	66	Centripetal "center-seeking" acceleration
15.	Fig. 5.7	83	Weight and gravity
16.	Fig. 5.12	86	Weight in an elevator
17.	Fig. 6.12	103	Zero net torque
18.	Fig. 7.5	123	Atomic structure
19.	Fig. 7.13	131	Elements as solid, liquid, or gas
20.	Fig. 8.9	141	Ice lattice
21.	Fig. 9.5	154	Mechanical advantage and Pascal's principle
22.	Fig. 9.7	156	Archimedes' principle
23.	Fig. 10.3	169	Pressure, volume, and temperature
24.	Fig. 10.13	176	The heart as a force pump
25.	Fig. 11.7	192	Fahrenheit and Celsius temperature scales

No.	Identification	Page	Topic
26.	Fig. 11.8	193	Some Celsius-Fahrenheit comparative temperatures
27.	Fig. 11.11	196	Units of thermal energy
28.	Fig. 12.6	212	Change of phase
29.	Fig. 14.5	243	Wave characteristics
30.	Fig. 14.6	244	Longitudinal waves
31.	Fig. 15.11	267	The decibal scale
32.	Fig. 16.14	291	Lines of force
33.	Fig. 17.1	298	Flows require differences in conditions
34.	Fig. 17.12	307	Series circuit
35.	Fig. 17.14	309	Parallel circuit
36.	Fig. 18.6	322	Magnetic field around a straight wire
37.	Fig. 19.13	348	The EM spectrum
38.	Fig. 20.6	362	Thin film interference
39.	Fig. 21.16	386	Converging and diverging lenses
40.	Fig. 2, SF 22.1	394	Some geometrical illusions
41.	Fig. 22.17	408	More optical illusions
42.	Fig. 24.12	439	Transitions and line spectra
43.	Fig. 25.5	453	Isotopes
44.	Fig. 25.13	460	Radioactive decay series (uranium)
45.	Fig. 1, SF 25.1	462	Carbon-14 in the environment
46.	Fig. 26.9	477	Fission chain reaction
47.	Fig. 26.13	482	Plutonium-breeding reaction
48.	Fig. 27.3	499	Expansion
49.	Fig. 27.17	510	Comparison of stellar densities
50.	Fig. 1, SF 27.1	511	Light and a shrinking star
