

## The Video Encyclopedia of Physics Demonstrations™

The UCSB Physics Lecture Demonstration unit has two sets of *The Video Encyclopedia of Physics Demonstrations*™. One is the 1992 edition on LaserDiscs (also known as “Video Discs,” and for which we have the appropriate player). The second is the 2001 edition, which is bilingual (English/Spanish) and is on DVDs (for which we also have a player, and for which players are installed in both room 1610 and room 1640). Both sets contain indices that link the demonstrations to the appropriate sections in various college-level textbooks. They contain the same demonstrations, but the textbook indices are different.

Below is the list of demonstrations each set contains, and the list of textbooks for which each set has an index. Should you see a demonstration that is not currently available, and which you would like to have built, please [e-mail](#) me (Louis Grace) or phone me at x4293.
